NOT ONLY MACHINES.

PRODUCT OVERVIEW

SuperFax® *Europe*
Print Finishing Solutions

THE COMPANY

More functions and better quality for your brochures. After printing, our SuperFax machines produce professional brochures and leaflets. Simple and straightforward – from small print runs to complete automated pro-duction processes. SuperFax provides you with complete print finishing solutions. We strive for uncompromising quality in the construction of all SuperFax machines, which ensures a long service life.

We know paper. Since 1966.

Your benefits with SuperFax

· Designed for the digital printing market

  of the future

· International support

· Solid constructions, production control,

  a guarantee of defect-free operation

· Global exports

· All machines in stock.

  Delivery period from stock approx. 2–4 days

· Individual customer requests and

  tailor-made solutions are possible

· Our own training course for dealers and

  distributors

· Development in Germany

· Extremely competitive price-performance ratio

· We can test customer material samples (for SF-500EU) on request.

We are happy to test your paper for print finishing

FOLDING MACHINES

Simple settings and easy handling. Folding machines must be easy to operate and fold paper precisely. All **SuperFax** machines have been specifically developed to ensure fast operation and maximum precision. The solidity of the machines' metal frames ensures their durability and reduces noise output in equal measure. In addition to unrivalled speed, **SuperFax** also provides solutions for Chromolux and high-gloss paper, as well as for **special sizes.**

Enter the paper length, select the fold type, and the integrated computer does the rest automatically for all fold types! (SF-490 model only)

SuperFax folding machines are quality products, and for decades have proven themselves with continuous operation, providing precise, fast and problem-free service.

Single   **Letter**   **Zig-zag**   **Double-parallel**   **Fold-out**   **Gate**

SUPERFAX PF-460

MM **AUTO** **14K/h**

PF-460
the new high-tech automatic folding unit from SuperFax
An evolution of the globally-renowned PF-220 series

Fully-automatic and programmable desktop folding machine, up to DIN A3. High performance and quiet operation. Our tried-and-tested, fully-automatic folding machine, equally suited to high volumes and special paper formats. The PF-460 has memory for 36 fold types, which can be programmed and automatically accessed. The professional machine's simple operation means it can be used everywhere: in printing houses, copy shops, administrative bodies or societies.

· Call up 6 fold types easily with the touch of a button
· Manual entry for special formats
· Compact, space-saving design
· Retractable paper and print trays
· Memory can store 3 special formats
· Paper feed pressure has 5 pre-set levels, also freely adjustable

Paper Size	Max. 300mm x 432mm Min. 91mm x 128mm (Single fold only)
Paper Weight	46gsm to 160gsm *Up to 230gsm for single fold
Fold Types	Single, Letter, Zig-zag, Double-parallel, Fold-out, Gate and Crossfold
Speed	3240-14400 sheets/h
Paper feed pressure adjustment	5 leveles of paper feed pressure and separator pressure
Feed Table Capacity	500 sheets of 64gsm paper
Paper feeding system	Friction feed by 3 rubber roller
Paper size auto detection	A3, B4, A4, B5, A5, B6
Counter	4-digit ditial counter (addition or subtraction with auto-repeat)
Error detection	Jam map and Error code
Option	Perforation unit, Scoring Unit, SF-Z2 Special paper feed Unit for smooth paper
Skew Adjustment	Yes
Storing odd/special fold types	Yes (9)
Fold position setting by paper length	Yes
Paper ejection method	Neat stacking by carriage belt
Power source, consumption	110-120V. or 220-240V. 50/60Hz, 75W
Dimensions (stowed, in use)	W x D x H: 640 x 520 x 620 W x D x H: 870 x 530 x 520
Weight	33,5kg

SUPERFAX PF-440

DIN ✋ **9K/h**

Desktop folding machine in the established 400 series, suitable for industrial production and in-house production. High performance, long service life and quiet operation. Up to DIN A3. The SuperFax volume model is used by many companies around the world.

The PF-440 features the same construction as the PF-460, but without the programmability. Straightforward manual adjustment.

· Standard formats B6 to A3
· Manual entry for special formats
· Compact, space-saving design
· Retractable paper and print trays
· With stream delivery
· Paper feed pressure has 5 pre-set levels, also freely adjustable

Paper Size	Max. 300mm x 432mm Min. 91mm x 128mm (Single fold only)

SUPERFAX

FOLDING & STAPLING MACHINES

More than simply conveying content, high-quality brochures emphasise professional standards. Customers are more likely to pick up a well-made product. **SuperFax** has set itself the task of creating uncomplicated, durable products for print finishing. You only have nine seconds to make a first impression.
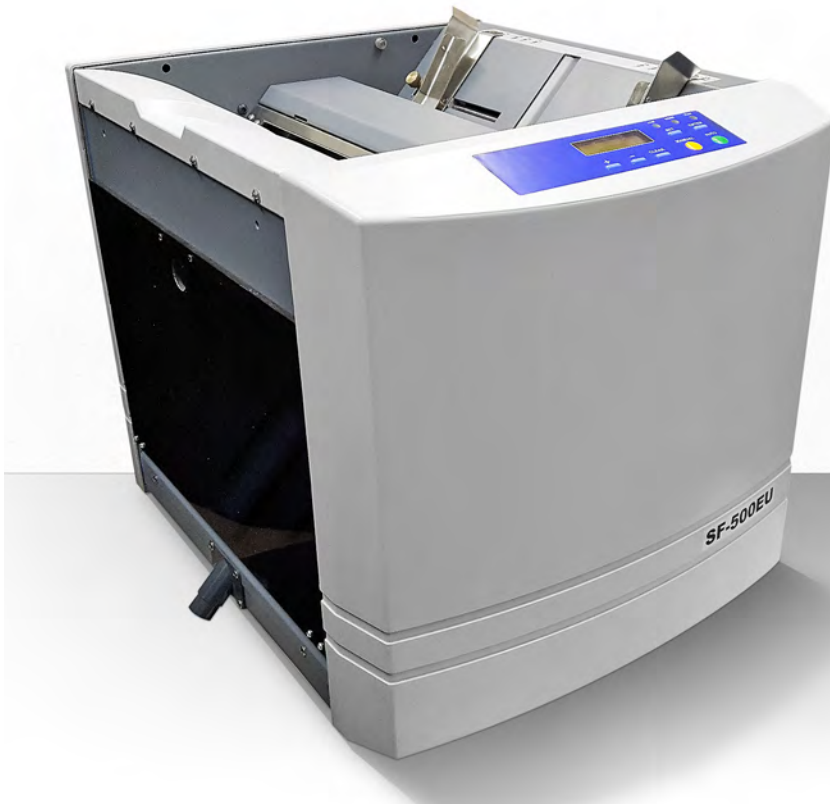

Alongside the patented "Bookletmaker", our product range consists of proven, durable folding and stapling machines designed for practical use.

Standard   **Eyelet**

SUPERFAX SF-5OOEU SRA3

The Superfax SF-500EU (up to SRA3 format) is the high-tech premium product for print finishing. The patented Bookletmaker staples, folds and completes a smooth, professional-looking square press in one complete process. The throughput time for all three work steps in the fast and extremely quiet machine is approx. 9 seconds per brochure.

A machine for quality-conscious customers who not only want to create a printed product, but want to leave behind a lasting impression – in the truest sense of the word.

In terms of its look and feel, a booklet with a book-style spine is superior to other print products, and also presents an advantage in terms of stacking the booklets for storage.

Suitable for the production of professional-looking brochures and bound technical information and data sheets in companies, copy shops and organisations/societies.

· For extensive brochures with high quality requirements
· Booklets no longer come apart – thanks to square pressing
· Professional results with minimal effort
· Automatic operation, up to 25 sheets
· Ringlets are Option (only possible without "square press spine")
· 4 stapling heads Optionly available.

· Uses standard staples
· Additional ringlets possible
· Option: extension with 4 stapling heads

COLLATORS

Collating books and loose sheets involves sorting and stapling the individual printed sheets or multi-layered brochures into the right order. To do this, the folded sheets are continuously laid on top of one another, sheet by sheet.

The special SuperFax collators can be expanded to become complete production lines in which the compiled sheets or layers are bound and processed directly after being collated.

SUPERFAX

SUPERFAX EC-4800

Paper Size	A3SR (320 x 450mm), A3, B4, A4, B5, A5 Max: 328 x 469 mm/Min: 95 x 150 mm (Optional large/small size tray required)
Paper Weight	35~210 gsm (1st & 10 bins, 2nd to 9th: 35~160 gsm)
Speed	70 or 40 sets/min. (A4 size paper) selective
Counter	LED 4-digit addition and preset subtraction functions
Bin Capacity	28mm (Approx. 350 sheets of 64gsm paper)
Stacker capacity	65mm (Approx. 800 sheets of 64gsm paper)
Feed Error Detection	Empty feed, Paper jam, Double-feed and No-paper
Paper Thickness Detection	Paper thickness on each bin is checked with photo sensor located in each bin
Setting of Feeding Pressure	3 different pressure levels can be set independently for each bin 4 pressure levels for bin No. 1 & 10
Setting of Separator Pressure	3 different pressure levels can be set independently for each bin
Noise Level	Less than 76 db
Power source, consumption	110-120 V. or 220-240 V. 50/60 Hz, 230 W
Dimensions	W x D x H: 545 x 560 x 1050
Weight	77 kg

High-performance collator with 10 trays. Our fastest machine processes 4200 pages per hour. Automatic detection of paper thickness, blockages, misfeeds and empty paper trays. The EC-4800 can process a wide variety of different paper sizes and grammages, from postcard format to SRA3 format.

· Faster, quieter, for format paper, up to A3+ or SRA3
· Can be combined with booklet maker, twin tower, stapler
· Options: PSM-18R (stapling and punching), EC-46S large capacity stapler, table for EC-4800 and PSM-18R, auxiliary paper feeds and stapler guides for SRA3 paper and very small paper formats, accessory set for the booklet maker, paper transport unit for the tower system

+ 4800 L

+ BK 25

+ PSM-18 R

Above is our 20 station EC-4800 + EC-4800L high performance collating unit with large, mobile EC-46S print tray (5000 sheet) – online operation available with SF-5000HCS or SF-3000 SOS booklet maker + trimmer – both possible depending on demand and requirements.

This unit processes 8400 sheets per hour. The sensors automatically detect the paper thickness, as well as blockages, misfeeds and empty paper trays. The machine stops automatically and displays the reason why. The EC-4800/EC-4800L unit can process a wide range of different paper sizes and grammages – from postcard format to SRA3 format.

The EC-4800 and EC-4800L high-performance collators can also be combined online with almost all booklet makers via an interface.

In combination with EC-4800 + EC-4800L and booklet makers, up to 80 pages can be produced per brochure.

Above is our EC-4800 collator with ten trays and Option PSM-18R corner stapler and punching device (2 holes A4 - A3). Automatic detection of paper thickness, blockages, misfeeds and empty paper trays. The EC-4800 can process a wide range of different paper sizes and grammages – from postcard format to SRA3 format.

· Fast and quiet
· Process all paper formats up to SRA3 with the PSM-18R stapling and punching machine

GROOVES & PERFORATIONS

Paper types with higher grammages can break at the folding edge during folding. Creating a groove removes material along the folding edge, producing an ideal folding location. The SuperFax groove machines are suitable for all higher paper grammages and all production involving solid board. Perforations enable parts to be separated (torn off), e.g. for coupons, entry tickets or vouchers.

Grooves and perforations require accuracy and an exact process. SuperFax machines are renowned for their ease-of-operation and simple yet precise adjustment.

Groove   Perforate

SUPERFAX SF-C30

MM   AUTO   2K/h

Paper Size	CD to 500 x 700 mm
Paper Weight	400 gsm
Speed	Over 2000 sheets per hour

SF-35E: Electric grooving and perforating machine with foot release and easy operation. The perfect complement for print finishing with the booklet maker series. Best suited to digital and offset printing houses, copy shops and copying centres.
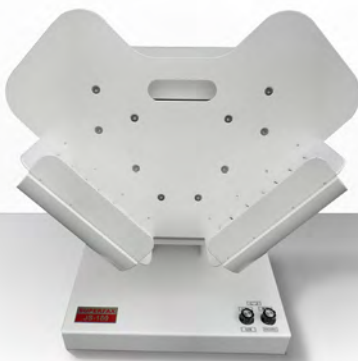

OTHER MACHINES

Whether in the office or the in-house production department, we provide you with high quality machines suited to your print finishing requirements. This not only includes collating, folding, stapling, grooving and perforating – to ensure that your processes run smoothly, we also offer a range of other machines to help you achieve perfect results.

SuperFax provides solutions, not just machines. Get in touch with us to discuss your individual requirements.

SUPERFAX JS-180 AIR-BLOW JOGGER

Our best-seller for professional use. Very quiet and uncomplicated. The machine fans out the paper with air, removing static and dust. By separating the sheets with air, the drying time of ink is reduced, which enables the printing results to be further processed more quickly. Easy handling. A solid machine for long-lasting quality.

The JS-180 can be easily placed in your work area and moved comfortably.

Paper size	A3 - B6
Paper width	127 - 329 mm
Paper length	187 - 483 mm
Tray capacity	Max. 1000 sheets of 80 gsm
